CLIENT ACCESS

Meridian \ Mə-ˈrɪd-ē-ən \, n.

1. an imaginary circle passing through any place on the earth's surface and through the North and South Poles; a representation of such circle numbered for longitude on a map or globe used to navigate
2. the highest point, as of success, prosperity, or the like; culmination—the zenith

Mission

The definition of "Meridian" has two facets. The first relates to the meridians of longitude, lines passing through the North and South Poles drawn upon the globe to help travelers navigate. The second relates to the highest point of achievement—the zenith.

Both concepts define our mission. We seek to navigate the difficult investment environment with a constant purpose: protecting clients' capital from evident dangers and from those dangers still unseen.
